Contract XC-1506 -

25X1

1. Production tooling for the gasoline engine generator UGP-12, resulting from contracts XC-760 and XC-1294, is being temporarily stored by the subject contractor. The UGP-12 has been designated as Agency Standard equipment. Therefore, long term storage of the manufacturing tools is desired.

2. It is planned that preservation and storage of the tooling be accomplished by [redacted]. A cost estimate has been submitted by [redacted] for the preparation of the tools for commercial shipment. An additional cost for storage through April 30, 1958, has been included in the estimate. The proposal has been reviewed and found acceptable when including the provisions outlined in Attachment "A."

25X1
25X1

3. It is requested that Contract XC-1506 be amended to provide for the additional storage time and preparation for shipment. Attached is Requisition No. WBS 50-360, indicating that the estimate to be charged for this work is \$7795.00. Funds in the amount of \$7740.00 have been encumbered for this project. [redacted] may be contacted for further information.

ATTACHMENT "A"

1. The manufacturing tools for the UHF-12 shall be packed for shipment, either by truck or rail, in accordance with sound commercial practices.
2. The contractor shall supply to the contracting officer, five copies of a new, complete listing of the tools showing the part number, part name, and/or description, and quantity of each item as soon as practicable.
3. When packing is completed, five copies of a revised tool listing, coded to the crate numbers, shall be submitted to the contracting officer.
4. One week prior to the shipping date, the contracting officer will be advised so that transportation can be arranged.
